A Total Waste Management Solution for the Nucleus Facility

Upholding Our Zero-To-Landfill Commitment

Challenge

Autolus, a pioneer in biopharmaceutical research, sought a comprehensive waste management solution to optimise efficiency, ensure compliance, and minimise environmental impact. They required a partner with expertise in handling diverse waste streams, maintaining consistency, and providing the utmost confidence that waste was managed responsibly and expertly, all while adhering to stringent regulations, including GMP standards.

Solution

Drawing upon our extensive waste management expertise and commitment to excellence, we tailored a solution to meet their every need. Working closely with all departments on-site, our team prioritises frequency, consistency, and reliability, ensuring precise waste handling and disposal at all times. Our comprehensive services cover various waste types, from confidential waste to hazardous materials, with a zero-to-landfill commitment and strict environmental regulation compliance. Using advanced technologies, we enable real-time monitoring, data recording, and auditing, ensuring the Nucleus maintains full traceability of the waste collection and disposal process journey. In addition, we provide comprehensive training for our cleaners, ensuring proficiency in waste disposal procedures on-site. We also choose to partner with local waste suppliers, reinforcing our commitment to sustainable waste management practices.

Contracts Manager
One Facility

> *We're always seeking the most environmentally efficient ways to dispose of waste, forging close partnerships with our suppliers to ensure we can track our waste at every step of its journey. It's been great to see the cost savings we've made for Autolus so far!*

Outcome

Our total waste management solutions ensure our clients longstanding high standards are consistently met, providing peace of mind, efficiency, and environmental responsibility. By delivering reliable services and ensuring GMP compliance, we enable the teams to focus on their core research activities without waste management concerns. With our expertise and dedication to excellence, the Nucleus operates in a waste-conscious environment, upholding its commitment to sustainability and regulatory compliance. Our partnership exemplifies our ability to deliver total solutions tailored to the unique needs of our clients, setting new standards in waste management excellence.

Total waste management solution

Streamlined the waste disposal process covering a range of waste types, from hazardous to recyclable materials, ensuring compliance and environmental responsibility.

Enhanced efficiency

We provide our teams with ongoing training on waste management practices.

Zero landfill policy

Upholding our commitment to sustainability with a comprehensive waste management strategy that diverts all waste away from landfills.

Rigorous compliance

Adherence to GMP standards and ALCOA principles, ensuring traceability, accuracy, and reliability in waste management documentation and processes.
