Environmental Policy

Policy Statement

As a facility management service provider One Facility is mindful of the impact its activities have on the environment and the communities in which the company operates. The company is committed to minimising the potential harmful effects of its activities on the environment and to the prevention of pollution by balancing its business aims with environmental consideration.

To demonstrate our commitment we undertake to:

- Maintain an Environmental Management System that is fully compliant with ISO 14001.
- Acknowledge and meet the requirements of statutory regulations relating to the environment.
- Ensure our operations are safe for our employees and the environment by developing appropriate operational procedures.
- Promote sustainable development in partnership with our clients and suppliers, to develop strategies for the reduction of energy usage, the conservation of materials and resources through minimising consumption and promoting the use of sustainable materials wherever possible, maximising efficiency and effectively managing waste.
- Provide employees with the right training to enhance their environmental awareness and the potential impact of their actions on the environment and the use of the correct control measures to minimise this impact.
- Set objectives and targets to monitor our environmental performance through evaluation of the environmental aspects from our activities.
- Encourage initiatives to enhance our environmental performance and reduce our impact on it.
- Comply with Legal and Other Requirements to which the organisation subscribes.

These objectives are continually reviewed and audited throughout the operational and support areas of our business, with findings, recommendations and amendments to our work processes communicated to all levels of our resource structure. This environmental policy is available to the public and external parties upon request.

This policy is the responsibility of the Board of Directors and will be reviewed periodically following Environmental Audits to ensure it remains effective and in line with current legislation. It is the responsibility of all employees to undertake a commitment to the working practice of this policy.

Simon O'Shea

Director
